I am hereby soliciting my opinion as to the content that the NAB is imposing on XM Radio.

It is preposterous that the FCC and NAB should have any say in what XM's customers are asking for - it's a PAID subscription and they are simply answering to the customer's demands.

I enjoy listening to the wide variety of music, news, and sports on XM and am further delighted that I can hear local traffic and weather now. I am also excited by the ability to hear weather in other regions of the country, as I travel frequently.

I implore the FCC to reject the NAB's petition 04-160 and allow XM's customers to decide what they want to hear.

Sincerely,
Rick Poage
